Local Items

Mr. and Mrs. Aitken and family who have been spending the winter in Vancouver, returned to their farm south of town on Saturday.

The first farmer reported to be working on the land in the Chinook district is L. Kure, who commenced discing on Wednesday, April 2.

E. E. Noble returned Sunday morning from Wadena, Sask.

Mr. and Mrs. N. Kerr who have been spending the winter at Bridgewater, Ont., returned to Chinook last Thursday.

L. S. Dawson has been appointed Process Issuer for Chinook.

Although it is not possible to get the exact acreage accounted for in the wheat pool contracts received during the present drive for membership in the Chinook district, L. S. Dawson, local secretary, estimated that some townships are reporting one hundred per cent signup. Many other districts have reported a 95 per cent signup.

A very important meeting for members of the Chinook Doctor Scheme will be held on Friday evening at 8 o'clock. A permanent committee will be elected and general business attended to.

A unique service will be held at the Chinook Union Church next Sunday evening, April 13, when the Boy Scouts will take charge of the service. They will give out the hymns, read the lesson, etc. It is to be hoped that the people of the town will give the boys all the support and encouragement within their power.

Card of Thanks

Mr. and Mrs. M. L. Chapman desire to thank their friends for the kindly help and sympathy shown them during the time of the sickness and death of their little son.

Alec Campbell has rented the farm of James Martin near town.

Robert Caldwell returned Saturday from Calgary to his farm north of town.

Mrs. Adain Marr returned last week from Ontario where she has spent a few months.

Mrs. W. C. Agar was a Calgary visitor last week.

Beware of Smut. The time to protect against it, is just before the seed is planted, and the treatment is both easy and inexpensive. Get the best Formaldehyde we have it. The Chinook Pharmacy.

Mr. and Mrs. Clifford Aarsby visited friends near Youngstown for a few days last week.

Miss DeMare arrived in Chinook last week to keep house for her brothers on their farm north west of town.

Mr. H. Howton and daughter Lily returned from Calgary Wednesday. They have been visiting Mr. Howton's mother who has been very ill.

Obituary

Garth Merrill Chapman

On Sunday night at 10 o'clock the little son of Mr. and Mrs. M. L. Chapman, Garth Merrill passed away. The little one was eleven months and nine days old, and taking cold a few days before his death it developed into pneumonia, and although every thing possible was done to check the disease it was impossible to do so, and death took place on Sunday evening.

The utmost sympathy of the community goes out to Mr. and Mrs. Chapman in their bereavement, and the display of lovely flowers and wreaths at the funeral expressed the feelings of their many friends in the time of sorrow.

The funeral was held on Tuesday afternoon in the Union church after a short service in the home. Rev. Mr. Harden conducted the service both at the Church and the grave. The pall bearers were Leslie Clipham, Alfred Deman, Vincent Rideout and Duncan McKenzie.

Mr. and Mrs. H. T. Lensegraf returned to their farm at Chinook on Saturday after spending the past three months in Spokane, Wash.

Mr. McNulty, Nakomis, Sask., shipped a car of horses from here to Saskatchewan on Saturday.

Mr. George Bennett has rented the former Young farm from the present owner, Mr. Oliver Jones.

CP-202

Development Of Pulpwood Industry Unequalled In The History Of Our Commerce

Development of some of the natural resources of Canada has within the two decades of the present century established records which are almost phenomenal, says the Natural Resources Intelligence Service of the Department of the Interior. The fertile lands of the prairies, owing to their outstanding importance as the source of the enormous grain crops which they have produced, have overshadowed all other development.

The prairies, however, are not the only natural resources in Canada that has come into its own on an impressive scale within very recent years. The older provinces of the east have witnessed the rise of an industrial prosperity that rivals even the record of western progress. The spread of commercial value over millions of acres of western farm lands is almost matched by the commercial romance of the northwest forests of Eastern Canada and British Columbia. For sheer rapidity of development there is nothing in Canadian experience—excepting only the advance of the farming frontier of the prairies, to equal the speed and alertness with which the Dominion's immense pulpwood area have been converted from idle into active assets that today rank among the very foremost producing properties of the country.

From earliest times the forests of Eastern Canada have played a leading role in building up commercial enterprises. The sawmill has invaded more Canadian communities and towns than almost any other form of industry. More than fifty years ago, when the several provinces were united by confederation, the new Dominion was known to other countries and contained for years to be known mainly as a source of lumber. And sawmill products have remained down to the present day as one of the chief classes of goods carrying Canadian trade into all quarters of the globe.

But after the long record of development and even centuries of broadening development, it has been left to the last ten or fifteen years to witness an utterly astonishing growth of forest industries. The pulp and paper mill has usurped the prestige of the sawmill. Lumbering still stands as one of the major pillars of Canadian industry, but in an amazingly short period it has seen the rise of a gigantic upstart which in some respects already overshadows it.

The sudden, almost magic diffusion of commercial value and activity over Canada's millions of acres of pulpwood forests is a striking example of how the needs of one country develop the resources of another. The native power behind the development of Canada's pulpwood areas is the voracious American market for paper, particularly for newspaper. The manufacture of newspaper is the bane of the Canadian paper industry and over 80 per cent. of the newspaper produced is exported to the United States.

Only ten years ago American mills were able to meet all but a small percentage of the domestic requirements but in the meantime the output has been steadily falling behind consumption. The use of newspaper has increased tremendously. On the other hand the depletion of the pulpwood supplies of the eastern and lake States has permitted only a moderate increase of American output. Faced with this situation American newspaper consumers are now compelled to import almost half of their requirements.

Canada has stepped into the breach. Her exports of newspaper alone have risen from less than four million dollars in 1922 to over eighty million dollars in 1923. Thus the Dominion's pulpwood resources, after suffering a long period of commercial indifference and costly expense to every form of interest save that of industrial need, have suddenly been drawn into use on a scale and with a degree of activity rarely equalled in the annals of world commerce. Indeed has the handiwork of international trade reacted out and as swiftly fitted any industry from half a century of inactivity to the status of an industrial giant.

It is an necessity to recall a long succession of statistics in order to estimate the importance of this new entry to the ranks of outstanding Canadian industries. But some idea of its relative power in enhancing the commercial strength of the Dominion may be gleaned from the fact that its main product—paper—stands second to wheat only among the commodities entering into Canada's sales abroad. Ten years ago the Dominion's exports of paper amounted to less than \$7,600,000—or about one-third of the exports of cheese alone. This year all of the cheese and butter exports from

Canada's three thousand dairy factories, plus all of the apples and other fruits from the famous orchards of British Columbia, Ontario and the Annapolis Valley, plus all of the cattle from the ranches of the west and the stock farms of the east, all of the salmon, lobsters, cod, halibut and other species shipped from Canada's varied fishing grounds to every corner of the globe, all of the furs from the northern territories that have fed the fur markets of the world for centuries—all of these exports lumped together are scarcely equivalent to the value represented by the Dominion's shipments of paper in 1923.

This industry—the manufacture of pulp and paper—which has been reared to such dimensions in one decade as to overshadow enterprises long established as major pillars of the Dominion's trade abroad, stands out as one of the truly impressive features on the skyline of the newer commercial Canada.

To Suppress Drug Traffic

Canada Has Declared War On the Dangerous Drug Heroin

Canada has declared war upon another dangerous drug.

The Dominion has notified the League of Nations that it will heartily support the proposal that the drug should be regarded as harmful and that its sale shall be totally suppressed save under the strictest medical control.

Canada took the initiative in this matter and, through its representative, notified the league of the action it intended to take at the next meeting of the committee dealing with the sale and distribution of dangerous drugs and it has already received the support of several influential members of the league.

The action was taken after consultation with distinguished medical authorities in all the leading countries of the world and after many hospitals in Canada and elsewhere had been canvassed on the question.

Canada is to ask the league for total suppression of the sale of the drug by physician's prescription as part of the campaign now being waged against harmful drugs.

Alberta Telephones

Earnings During 1923 Were the Greatest in Three Years

The earnings of the Alberta Government telephones for 1922 amounted to \$3,261,663.16, which is the best showing for the past three years, according to the annual report of the government telephones, which was tabled by Hon. W. S. Smith, minister of railways and telephones in the legislature.

The telephone expense for last year was \$1,287,722.53, which is the lowest in proportion to the earnings for the years 1921 to 1923, inclusive.

Although there has been an increase in the earnings over the expense, owing to the steady increase in unavoidable expenditure, there is a possibility of increased rates, according to the report.

During the year, 802 telephones were added, at a cost of \$164,365. The total number of telephones in use is given as 67,297.

Supremacy of Canadian Cars

The supremacy of Canadian-made automobiles and motor trucks in the New Zealand market is shown in returns published by the Commercial Intelligence Journal. Canada sold nearly twice as many cars in New Zealand last year as did the United States and quadrupled its own 1922 business. In 1923, New Zealand imported 7,280 cars, worth £66,384 from Canada, as compared with 4,309, worth £54,171 from the United States.

The ancients believed that a child born on October 2 would die a wicked death. For adults, blood-letting was barred, no drinks were to be taken and no good eaten. Otherwise, death within forty days was promised.

Fond Of Rice

Porto Rico's rice consumption last year was 120.7 pounds per capita, or approximately one-third of a pound a day for each man, woman and child. This is an increase of 16 pounds per capita over 1922.

Getting the Effect

Bride (the butcher).—What sort of road do you think would go well with a perfect darling of a blue-and-white dress set?

Washington, Oregon and Idaho produce nearly half of the commercial apples of the United States.

Wealth From Tourists

The Value of Good Roads and Provisions Made for Visitors

While of course it can only be approximate, the estimate of the Dominion Parks Board that \$336,000,000 was spent in Canada last year by foreign tourists is arresting. The board couples the estimates with an obvious deduction that might be overlooked, namely, that although the scenes beauties brought so much money into Canada it was not accompanied by any depletion of natural resources. The same scenery will be there for others to gaze at this year.

By provinces the returns are figured this way:

British Columbia \$36,000,000

Alberta 20,000,000

Saskatchewan and Manitoba 16,000,000

Ontario 36,000,000

Quebec 36,000,000

Maritime 16,000,000

Alberta is probably the best exhibit as an indication of what can be done. The enormous increase in tourist revenue for that province is almost entirely due to the opening up of the Banff and Jasper Parks, the construction of automobile roads and the provision of accommodation for visitors. There have been those who have criticized expenditures on these parks and who have shown slight concern over threatened encroachments by private power and other interests. The story of the Banff tourist should be sufficient answer.

The Dominion Parks Board is doing national service not only in the parks under its control, but in drawing attention to the riches that Canada's beauty spots can be made to attract in this age of the automobile. From the Ottawa Journal.

More Horses Than Ever

Motor Cars Have Not Dribbed Out Of Business

It used to be said that the motor car would put the horse out of business. But it has not done so. To some of us horses may seem few, but they are not. The agricultural census of Canada shows that there were 1,025,301 more horses in Canada in 1921 than there were in 1911. The actual figures were 3,621,262 in 1921 and 2,598,955 in 1911.

Motor cars have invented a lot of the work they do. One can stand on a corner and see scores of cars driving down town in the morning, each carrying its solitary passenger. These men were not formerly horse-baited, but came down town in street cars. Motors are sometimes seen in a continuous stream going towards Hamilton. People used to go to Hamilton by train or boat. Because motors can make journeys no one of them are kept busy doing it.

Motors, too, are good of roads, and thousands of horses are kept busy hauling road materials—not to mention the horses which have been much used of late hauling motors out of snow banks and mud holes.—Toronto Star.

Shipments of Fruit to Prairies

During the past year the Agricultural Board of British Columbia shipped 2,225,000 boxes of fruit to the provinces of Manitoba, Saskatchewan and Alberta, while 627 cars had been sent to various foreign markets, including Holland, Belgium, Scandinavia, China, Africa, New Zealand and Mexico.

When a man insists that he knows what he is talking about, make him prove it.

Astrologers of old say that the 5th and 12th are October's unluckiest days, and are to be banned for all business enterprises.

Farm Labor Supply

Farm Wages Will Be Based On \$40 Per Month

The report of the conference of representatives of organized farmers and officials of the Employment Service which met in Edmonton on March 7, has been received from the secretary of the conference.

The organized farmers of Saskatchewan were represented by Mr. R. M. Johnson of the Grains Growers' Association, and Mr. W. C. McCullum of the Farmers' Union of Canada. Manitoba and Alberta's organized farmers were also in attendance, as well as representatives of the two railway companies and representatives of the Employment Service in the four western provinces.

Among the problems discussed at

the conference was the question of farm labor supply and the probable wages for the coming season. From information submitted to the conference by the Employment Service, it would seem that an adequate supply of labor might be available for farm work spring.

The conference went on record as being of the opinion that \$40 per month for summer farm work should be regarded as the going wage.

The \$40 per month was decided merely

as a basic wage upon which such other calculations as may be necessary might be determined.

Big Increase In Trade

Both Imports and Exports Show Considerable Gain

The total trade of Canada for the eleven months of the fiscal year ending March 31, 1923, was \$1,771,351,252, or \$193,188,505 more than in the corresponding year. Both imports and exports shared in the increases. Imports and exports were up \$95,000,000; exports of domestic merchandise amounted to \$98,000,000. Of domestic exports in the eleven months agricultural and vegetable products, with a total of \$365,000,000, form the largest item. Next come wood and wood products with a total of \$245,000,000. Of imports, the total iron and its products came first, with a total of \$156,000,000 a total of \$245,000,000. Exports during the month of February were ten millions higher than in February, 1922; imports were three millions lower.

Wheat In Alberta

Average Yield of 19/4 Bushels Over a Period of 26 Years

Alberta has maintained an average yield of spring wheat of 19/4 bushels per acre over a period of 26 years, according to a chart prepared by the Department of Agriculture. In addition winter wheat has averaged, over the same period, 26.19 bushels; oats, 35.79 bushels; barley, 26.10 bushels; rye, 18.81 bushels; and flax, 8.77 bushels.

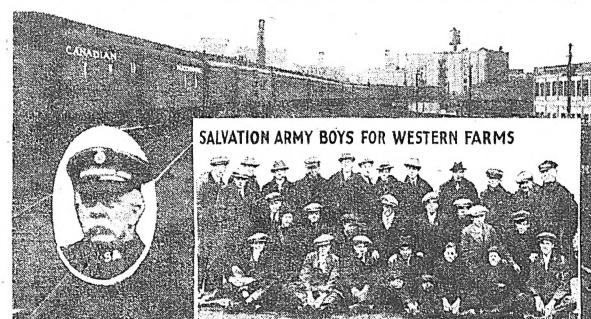

Ship Battle to Japan

By arrangements made by Hon. G. Headley, Minister of Agriculture, province of Alberta, a tidal shipment of cows and steers will be made in the near future to Japan, for the purpose of testing of the possibility of a market for Alberta's livestock in that country. It is also the purpose of the department to send with the shipment a qualified investigator who will look into the possibilities of a market for all of Alberta's farm products.

The average length of life in the

United States is now 56 years; in 1916 it was 52 years; in 1870 it was 41 years. In India the average is but 24 years.

HUSKY NEW FARMERS ON CANADIAN NATIONAL

SALVATION ARMY BOYS FOR WESTERN FARMS

Fertile Agricultural Lands Can Still Be Homesteaded In Northern Alberta Areas

Tent Caterpillars

Trees Growing on Prairies Badly Damaged by This Pest

Certain areas in Alberta, Southern Saskatchewan and Manitoba, were seriously infested in 1922 by Forest Tent Caterpillars. The districts referred to are shown on a map forming the first page of a circular issued by the Dominion Entomological Branch, and prepared by J. J. de Gruy, assistant entomologist, stationed at Indian Head, Sask.

The pest feeds on the foliage of trees, such as cottonwood, willow and ash, seriously sappling their vitality. The circular contains an illustrated description of the caterpillar, along with methods of control and types of spraying outfit, which should be brought into play on infested trees in the early spring, as soon as the buds open.

The conference went on record as being of the opinion that \$40 per month for summer farm work should be regarded as the going wage.

The \$40 per month was decided merely

as a basic wage upon which such other calculations as may be necessary might be determined.

The days of rushes for homesteads in Western Canada are practically over and the army of invaders is searching for free government lands upon which to file claims each year as the extent of such land available for settlement gradually shrinks. Pioneer and all that it means, is a phase that is rapidly passing, and Western Canada has rapidly taken on the aspect of a permanently established and prosperous agricultural area with all the comforts and conveniences of modern life. To secure land in any large homestead block the homesteader must travel far, but in certain sections, even yet, fine fertile agricultural lands are procurable for the filing and cultivation duties.

The outstanding area of those is undoubtedly the Peace River country, popularly termed the Last West, which comprises a very large area of the province of Alberta north of the Athabasca River and to the north and west of the Peace River as far as the 60th parallel of latitude north, which is the northern boundary of the province, and west to the boundary and the British Columbia line. J. K. Cornwall, an outstanding pioneer of this area, who has done much for its development, recently drew up an account of the agricultural and timber resources of this country for the Alberta Minister of Agriculture, in which he claims that 50 per cent. of the district is capable of the kind of agricultural development as any part of the province further south.

With the exception of the Grande Prairie and part of Peace River country, the latter, is more or less wooded, poplar and spruce being the principal trees. There is plenty of rainfall and the winters are any colder than any part of Central Alberta. Snowfall will average over two feet a year. The whole country was at one time covered with bush or wood buffalo, a band of about two thousand running wild there at the present time, and this is taken as a strong argument for the fertility of the soil, it being pointed out that where the buffalo ranged on the prairie in the old days is the best ranching country today. In the early days ranchers seeking location did so where it was known buffalo ranged in the winter.

At various trading points in this area, cereals and vegetables of all kinds have been grown for generations. The entire area produces a plentiful supply of long grass. Cattle and horses do well and are comparatively free from diseases, which are, in fact, almost unknown in the north. Wheat has been grown for forty years at Vermilion, which is a point 300 miles south of Edmonton, and wheat, which in 1875 took the world's prize at the Philadelphia Centennial, was grown at Fort Chipewyan in an even higher latitude.

The country is described as albatross and decomposed vegetable matter soil. At least one-half of the cultivable soil in Northern Alberta lies in the section described. The centre of the province of Alberta is a point 5 miles north and 25 miles west of Edmonton, which gives some idea of the tremendous extent of land that is available for settlement in the future. There is less actual acreage that is not fit for cultivation in Alberta than in any other province in the Dominion.

This area, it is claimed, has few superiors as to soil or climate in Canada. The country is comparatively free from wind and blizzards are unknown. During the growing season a sunfish will burn a card for 12 hours. Grains and vegetables require two to three weeks to mature than in Central and Southern Alberta. This is on account of the daylight and the sunlight. There is a sufficient quantity of merchantable spruce timber in the country to take care of all its local requirements.

This is the Last West, and those who know it may be excused for terming it the "Best West." It is one of the few remaining resorts on the continent for the seeker after free lands, and according to all the descriptions which come out of that area, and its already noteworthy achievement in a brief development history, some of the best of Canada, from an agricultural point of view, has yet been reserved.

Our Upish Help
Mistress.—I shall expect you not to wear my clothes.

New Maid.—You need not worry on that point, madam. I should never patronize your dressmaker.

Grimsby, England, is now the greatest trawling centre in the world, between five and six hundred steam trawlers alone are now registered at this port, in addition to many other vessels.

SENATE REFORM IS NOW PROPOSED FROM THE INSIDE

Ottawa.—Reduction of the membership of the Senate of Canada, and the retirement of senators at the age of 75 was proposed in the Senate by Senator Turiff, the Progressive member of the Senate. The debate on his resolution was adjourned, after some discussion, by the Government leader, Senator Dandurand.

It would be better, Senator Turiff said, in presenting his resolution, for the Senate to reform itself than to have the people reform it. There was criticism of the Senate and of the manner of its appointment, especially in Western Canada. Senate reform was always the policy of the party in opposition. There should be a reduction in the cost of this body. The excessive cost of government must be reduced. Canada was over governed. More work should be provided for the Senate which also should not be permitted to become one-sided. The opposition party should have the right to appoint a certain number of senators after the government had a majority. He was not in favor of the election of senators by provincial legislatures. He preferred an appointed Senate. That system so far had proved satisfactory.

Senator Bradbury seconded the resolution to give Senator Turiff a chance to place his views before the Senate. He did not endorse the proposal.

Steepjack Has Nasty Fall

Sudbury, Ont.—Walter Lashbrough, professional steepjack, is in hospital here with nearly every bone in his body broken, as the result of a fall from the top of a 55-foot chimney stack at Pakesley. Lashbrough and two others were putting a screen over the top of the stack before resuming work when part of the scaffolding collapsed, and he was precipitated to the ground. His companions saved themselves by clinging to the woodwork until assistance arrived.

He Suffered For Three Years

Then Mr. John Jensen Used Dodd's Kidney Pills

Saskatchewan farmer suffered from backache and stiffness in the joints and was restored to good health by using Dodd's Kidney Pills.

Eddyside, Sask.—(Special)—"For about three years I have suffered from backache and stiffness in my joints. I did not sleep well and had very little appetite in the mornings. I took two boxes of Dodd's Kidney Pills, and have found that they did me a lot of good."

This statement is made by Mr. J. Jensen, well known in this place. Mr. Jensen's troubles were caused by the kidneys. That's why he got such prompt relief from Dodd's Kidney Pills, for they act only on the kidneys.

When the kidneys are not right, they fail to do their full work of filtering the impurities, as the wastes, dirt and mud of the blood. There can be no pure blood if the kidneys are wrong. There can be no good health unless the blood is pure.

Ask your neighbors if Dodd's Kidney Pills are not the sovereign remedy for sick kidneys.

Many Germans Coming to America Stuttgart, Wurttemberg.—Eighteen thousand persons left Wurttemberg for America in the first half of 1923, and the estimated emigration in the last six months of last year is 40,000, making roughly 58,000 emigrants to America from this state alone, or about half the German quota. The entire population of Wurttemberg is about two and a half million.

Cuticura Heals Face Disfigured With Itchy Eczema

Eczema on my face and head. Later came so bad that they were covered with large scales. The itching and burning was so severe that I could not sleep at night. My face was badly disfigured. My hair became dry and lifeless and fell out so that I had to have it cut off close to my scalp.

"A friend advised me to try Cuticura Soap and Ointment so I purchased some, and after using two boxes I was greatly relieved and my face was healed." (Signed) Mrs. Elmer King, Box 278, Jackson St., Ontario, Nova Scotia.

Make Cuticura Soap, Ointment and Cream daily toilet preparations. 50¢ a box. Freely Mail Address: CUTICURA, Box 244 St. Paul St. W., Montreal. Sold every where.

Cuticura Soap removes without mucus.

W. N. U. 1519

Estimate Cost Of Completing H. B. Road

Ottawa.—An estimate of \$2,000,000 as the approximate cost of completing the Hudson's Bay Railway between Mile 332 and Port Nelson, was given by the minister of railways in the houses in reply to a question by T. W. Bird (Progressive, Nelson, Man.). Mr. Graham said this did not include the railway terminals at Port Nelson, nor would it complete the railway for operation, as it would cost \$4,250,000 to put the line from The Pas to Mile 332 in proper operating condition.

Prince Fools Parisians

Detectors and Reporters and Has a Nice Quiet Time

Paris.—The Prince of Wales, after a visit to Paris, has left for Biarritz, to the great relief of the Secret police entrusted with the task of keeping watch over the royal visitor in France. The Prince, who is travelling as the Earl of Chester, neatly fooled detectors and reporters. A huge automobile, bearing the coat of arms of the British embassy, remained standing outside his hotel until noon. As the Prince had not appeared, the detectors were much worried.

Afternoon newspapers published photographs of the automobile with the caption, "The Prince of Wales is the Latest Riser in Paris."

In the meantime the Earl of Chester escaped through the rear entrance of the hotel and took lunch in a modest restaurant near the boulevard with a former interpreter, who was attached to the British army during the war.

PEA IS MADE FOR REDUCTION IN THE TARIFF

Ottawa.—An immediate and substantial all-round reduction in the tariff was requested by a delegation from the Canadian Council of Agriculture, which met Premier King and practically all members of the cabinet. The request for tariff reduction was voiced by J. W. Ward, secretary of the council, who expressed satisfaction at the "promise" contained in the speech from the throne of a reduction in the tariff on implements of production.

"Such a reduction is not sufficient to satisfy justice," said Mr. Ward.

The tariff on implements of production should be abolished. Canadian manufacturers can compete in the markets of the world with manufacturers of other countries."

He urged reduction in the duties on food, clothing and the necessities of life, and insisted that the tariff should be strictly a tariff for revenue only.

The delegation was headed by W. A. Amos, president of the Canadian Council of Agriculture, who stated that it came under instructions given at the last meeting of the council.

Agriculture was in an exceedingly bad way, in spite of the fact that the 1923 crop had been very large and that the production of other forms of produce had been greater, or as great, as in any previous year.

The value of farm products had decreased by \$70,000,000 last year as compared with the previous year and the farmer was no better off today than if his crop had been small.

"I am safe in saying that never was there a time in the history of Ontario, or of Canada, when there was such a scramble for farm loans or so many failures," said Mr. Amos.

The farmers were constantly accused of being "grouches."

It was thus that such accusations ceased.

Premier King.—I agree with that.

All the farmer demanded today was a dollar's worth for his dollar, continued Mr. Amos. He was not getting this and the proof of it lay in the desperate attempts of manufacturers to convince the public that he was.

The farmer must have some redress or there was danger of the collapse of the whole industrial fabric.

J. W. Ward, secretary of the council, pressed the necessity of the immediate completion of the Hudson's Bay Railway. The grading was completed, the steel was laid within 22 miles of the bay. The navigability of the Hudson's Bay route had been sufficiently demonstrated to justify proceeding with construction of the line.

Farmers Owe For Seed Grain

Ottawa—Canadian farmers still owe the government \$5,261,000 for seed grain advanced to them, Hon. J. A. Robb, acting minister of finance, stated in the houses recently. The amounts charged against the various provinces are: Manitoba, \$110,737; Saskatchewan, \$3,555,283; Alberta, \$1,567,751; and British Columbia, \$197.

Memphis is the largest manufacturer of cottonseed products.

REALIZING ON THE ASSETS OF DEFUNCT BANK

Toronto.—Official liquidators of the Home Bank of Canada are proceeding with their work of realizing on the assets of the defunct bank and are pressing claims for payment of the double liability upon shareholders without regard for the new phase that has developed in the claim of certain interests that the bank had never been properly incorporated, and that, being insolvent in 1913, its charter could not be legally renewed under the Bank Act, and, therefore, that it did not exist as a legally incorporated bank.

There are said to be interesting possibilities from the standpoint of the creditors and shareholders in the event of this contention being upheld by the courts. For the bank, in the event of failure to determine its legal qualifications, would at once assume the status of a partnership, with each and every one of the shareholders, a partner, in the institution, and, as such, liable for the bank's liabilities up to the full extent of their individual resources.

Charles Garrow, K.C., master of the Supreme Court, has agreed to appoint a solicitor and counsel for all shareholders who are opposing the double liability, but the name of the appointee has not yet been announced.

Offers Landing Field To British Airmen

Seattle Sending Message to Air Ministry at London

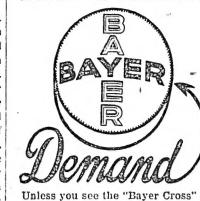

Seattle.—An invitation to the British army aviators who are attempting to fly around the globe, to make use of Sand Point aviation field, northeast of here, will be cable to the British air ministry at London, England when the United States army fliers, who are also trying to encircle the earth, leave this city, according to Captain C. J. Hutchinson of Seattle.

The following message has been prepared for transmission:

"The city of Seattle and King County, Washington, respectfully tender the royal air squadron on their world flight all facilities of our Sand Point landing field, from which the United States army air squadron started on their flight around the world."

ASPIRIN

Beware of Imitations!

Unless you see the "Bayer Cross" on packages or on tablets you are not getting the genuine Bayer Aspirin, proved safe by millions and prescribed by physicians over twenty-three years for colds, headache, toothache, neuralgia, rheumatism, neuralgia, pain, pain.

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proven medicines. Handily boxes of 24, 48, 96, 144, 288, 576, 1,152, 2,304, 4,608, 9,216, 18,432, 36,864, 73,728, 147,456, 294,912, 589,824, 1,179,648, 2,359,296, 4,718,592, 9,437,184, 18,874,368, 37,748,736, The Hygiene Of Old Age

Principles to be Applied in Order to Make Old Age a Pleasure

In a recent broadcast on the "Hygiene of Old Age," Surgeon-General Hugh S. Cumming makes a plea for a better understanding of this condition and argues for an attitude of optimism and cheerfulness when dealing with elderly people.

"There is too much of a tendency among persons reaching a certain age to pessimise themselves that they have reached the last page of the book of life," says Dr. Cumming. At this point, he continues, "many seem to think that both mental and physical activities should be relinquished. The contrary viewpoint should hold. Efforts should be made to preserve an equilibrium of mind and purpose that old age will become a period of content and enjoyment."

Unless the primary industries of the country are to be relieved of some of the excess which were introduced in war time, and which have not since been removed, it is futile to expect a restoration of general prosperity. The purchasing power of those engaged in these primary industries is destroyed by the unprofitableness of their labors and the discouragement of their efforts. What they sell is back to pre-war prices; what they buy is not. It is this to remain so, it follows that our primary industries will languish, in which case our secondary industries cannot hope to thrive.

It means infinitely more, for instance, to the manufacturers of Canada that the growing of cattle should be a profitable industry in Canada, than that the hauling of cattle across the Atlantic should be a highly paying business. Toronto Star.

Water Required By Plants

Are Heavy Drinkers According to Agricultural Expert

In spite of prohibition, plants are heavy drinkers, according to Sidney B. Haskell, director of the Massachusetts Agricultural Experiment Station at Amherst, Mass.

Four pounds out of every five pounds of harvested potatoes are nothing more than water. This quantity, although large in itself, is very small compared to the total amount of water used by the crop.

During the growing period for potatoes, these passes through the plants on an acre of land the enormous quantity of 700 tons of water. This is enough to cover an acre of soil to a depth of more than six inches. It represents the amount of water used by the plant in the process of growth, and also the water which must be delivered to the plants by the soil for uninterrupted growth.

A crop of oats uses more water than the potato crop and has a shorter growing season. For this reason oats must have a more moist soil, they "dry" the soil so badly that crops following often suffer from lack of moisture. When oats lose water than oats, and because of this grass and clover are sown in wheat rather than in oats. Both rye and maize require less water per unit of crop produced. The latter, however, brings in a larger total production and requires on the whole larger amounts of water than the former. Plants having shallow and fibrous roots are better adapted to wet land than to more deeply rooted crops.

A Meeting of the Bored

Baltimore Minister Thought He Had Right to Attend

A Baltimore divine who was staying in Los Angeles went to church the first Sunday after his arrival and later expressed his opinion of the service. He had gone to worship his Master, but to his surprise, was forced to sit through a long discussion on ministerial politics which was delivered under the guise of being a sermon. At the close of the sermon, the minister announced that when the service was over, he would like to meet the board in the vestry. The Baltimore divine, in company with several other solemn-looking gentlemen, proceeded to walk toward the vestry. The minister, thinking there must be some mistake, tapped him coolly on the shoulder and said: "I think you are mistaken, sir. This is a meeting of the board." "Well," replied the Baltimore divine, "I have listened to your political views for more than an hour, and if anyone has been more bored than I have, I should like to meet him."

B.C. Timber For Old Country

Timber for construction of the Belfast dock, at Belfast, Ireland, has been ordered from British Columbia mills. There are also orders just received for timbers for Cardiff, Wales, and English and Scotch points. Renewed orders have been received from India and Egypt for B.C. fir timber and logs. Two ships will sail within the next sixty days with out cargoes for South Africa.

A man without a single idea is less of a bore than a man with only one idea.

W. M. C. 1319

Farmer Should Have Even Break

Everything That He Buys Is Up and What He Sells Is Down

The present rate for carrying cattle from Canada to England is \$20 a head, which is more than double the rate charged before the war at the time Sir Thomas White went to England hoping to break the ring which controlled ocean freights. At that time the entry was mostly against the high rates charged for carrying wheat. While the freight cost of carrying cattle across the Atlantic is more than double pre-war rates, the cost in Canada of producing cattle is much more than in pre-war years. The prices of all that the farmers and ranchers produce went up in war-time and later came down with a thud, but the rates they pay for transportation by land and water, the prices they pay for all that they buy, remain some of all the war time inflation.

Unless the primary industries of the country are to be relieved of some of the excess which were introduced in war time, and which have not since been removed, it is futile to expect a restoration of general prosperity. The purchasing power of those engaged in these primary industries is destroyed by the unprofitableness of their labors and the discouragement of their efforts. What they sell is back to pre-war prices; what they buy is not. It is this to remain so, it follows that our primary industries will languish, in which case our secondary industries cannot hope to thrive.

It means infinitely more, for instance, to the manufacturers of Canada that the growing of cattle should be a profitable industry in Canada, than that the hauling of cattle across the Atlantic should be a highly paying business. Toronto Star.

Things You Want to Know About Home Decoration

By DOROTHY ETHEL WALSH.

National Authority on Home Furnishings.

By DOROTHY ETHEL WALSH.

When Cretonne Is to Be Used.

that one is invariably attracted to a new way in which it is displayed. We have long felt that too much cretonne used in a room makes hideous its charm. Often it is found dressing the window, the stairs, the table, and in fact utilized in every available location. It is decorative in itself, and when given an opportunity to show this decorative quality it satisfies. When overdone and used in large amounts it becomes monotonous.

In today's illustration you will see that a bright red cretonne utilized in a strikingly effective manner. The chair slings are made of the material, and because its very brilliancy warned against too much of it being used the decorator of this room decided against making it into window draperies. Instead, plain material the same tone as the blue flowers in the cretonne was hung in the windows. So as not to let the furniture appear isolated from the general scheme panels of the cretonne were framed and one hung on each wall. This treatment of the walls ties the entire room together and has created a more restful interior.

Saskatchewan Is Increasing Hog Production

No Danger of Over Production if Right Type is Raised

Saskatchewan is increasing its production of hogs. During 1925 there were 205,000 marketed at stockyards and abattoirs as compared with 125,601 in the preceding year, according to C. M. Learmonth, president of the Saskatchewan Swine Breeders Association.

"Fear of over production can be set aside if two things are borne in mind," says Mr. Learmonth. "We must raise the right type and produce it at a cost so that packers can sell in competition with the rest of the world. We produce an excess of finishing feeds in Saskatchewan while our greatest competitor has to import the bulk of her feeds."

"For any export trade the following requirements are essential: (1) That the volume is evenly distributed and regularly of supply maintained; (2) That the carcasses be of correct qualifications of length, shape and weight; (3) That with a comparatively mild cure, overseas market has an unlimited capacity.

"Saskatchewan is not rushing head long into the swine business, but an energetic effort is being made to produce the proper type and quality which will bring a steadily increasing outlet. The slogan of the Swine Breeders' Association is 'A couple of brood sows on every farm.'

A Changed Heart

World Can Be Changed When We Have Changed Persons

Nathaniel Hawthorne has given us a story, entitled "Earth's Holocaust," the tale of some men and women who had become weary of their toil and toilless and who had decided to be rid of their foolishness and trifleries. They determined to make an end of them by burning. A great mountain of useless and silly possessions was lighted.

The flames and smoke of them rose in the sky. There were present a number of reprobates, sad of countenance, now that their business was done. Satan himself came to comfort them. "Be not cast down, my peers," he said, "there is one thing these wretched creatures have forgotten."

"What is that?" they all shouted. "Why, the human heart; unless they lay upon some trick of torturing that out thing it will soon be the same old world again." A changed heart makes a changed person. We will change the world when we have changed persons. "The soul of every person is the reform of the soul," said Horace Bushnell.

Fixing the Blame

People hands were lifting Pat from the wreckage of his automobile, which has just been struck at a grade crossing by a fast passenger train.

"How did it happen?" asked a friend who was with the rescue party. "Boggera," fumed Pat. "It's more than I can understand. You'd have thought that the engineer of the train could have seen me coming in broad daylight!" Everybody's Magazine.

At Great Britain were only able to collect the \$10,000,000,000 owing to it by its allies, there would be a wonderful change in the condition of its domestic affairs: a huge lightning to the taxpayers' burden.

Turn Buffalo Loose

Proposal to Ship Buffalo From Wainwright Park to Far North Country

Plans for the shipment of buffalo from the Wainwright range to the Wood Buffalo Park in the north have been considerably curtailed due to the economies which are being put in force by the Federal authorities says the Edmonton Bulletin.

It was at first intended to transport 2,000 of the animals from Wainwright to the north, where they would have been turned loose in the territory occupied by the last herd of wild buffalo on the American continent.

Arrangements had been made for the shipment of young animals every year by train and river steamer to the banks of the Slave River, where they would have been given their liberty, but according to advice received in the city from Ottawa, it is understood that at the most 100 head will be sent out this year, while there is a possibility that the whole plan will be shelved for this present season.

Too Many!

We Appear to Have An Excess of Many Things

There are too many of many things: too many divorces; too many cases in the courts; too many scandals in high and low life; too many immigrants coming into the United States; too many children for the schools to accommodate; too many people with too many dollars; and too many with too few; too many boys in our colleges that ought not to be there; too many not in our colleges who ought to be; too many automobile accidents; too many murders; too many robberies; too many men doing too many useless jobs; too many soldiers in Europe; too many Japanese in Japan; too many Hindus and Mohammedans in India; too many high lights that fail; too many low ideals that come out on top. We seem to be living in an aged of "too many's." And there are too many people that do not care. —New York Post.

Lined Oil Industry

A slight decrease in the value of products produced in the Canadian oil industry in 1922 as compared with 1921, is shown in a report issued by the Dominion Bureau of Statistics. Production in 1922 was valued at \$5,558,627, as against \$6,223,376 in 1921. In each year the number of barrels reported was 8, of which 3 were in the province of Quebec, 2 in Manitoba and Ontario and 1 in Alberta.

A camera man out in Los Angeles was an asbestos suit when he rode on the front of a locomotive through a raging forest fire in order to secure some spectacular film footage.

Bright Gems For Her Velvet Gown

The Queen of Sheba very likely set the fashions for her day, and we haven't the least bit of doubt that had this been her day and generation the above gown is just the sort of gown she would have chosen, perhaps not to appear in before Solomon but at least to don for some socially lesser occasion. For it is a very gorgeous affair—indeed, really ornithologically dazzling. Liberally studded with bright jewels, rhinestones and emeralds, it does not in this photograph appear the beautiful thing it really is. —Ms. 12 volume.

Canada's Wheat Leadership

Progressive Outlook of Canadian Agriculturalists and Wheat Growers

President Coolidge's recent order advancing the tariff on Canadian wheat entering the United States has apparently not had the desired effect. The golden grain still filters through the tariff wall, and, according to Dr. H. M. Tory, president of the University of Alberta, in an address to the Ottawa branch of the Engineering Institute, it will continue to do so. In a few years, Dr. Tory believes, Canada will be exporting much more wheat to the United States.

According to Dr. Tory this situation is due to the progressive outlook of Canadian agriculturists and grain growers, who have not failed to take advantage of modern scientific methods in crop raising. Praise must also be given to the Canadian technical men who have devoted a life-time study to the perfection of grain suitable to the peculiar requirements of the west. Even now it is reported that a new wheat has been invented which will excel Marquis and the others, and which will extend the wheat line northwards to the fringe of the North West Territory itself.

Canada is now the world's largest wheat exporter. During the last crop this country outdistanced all others. The figures covering the period from July 1, 1923, to February 22, 1924, of wheat and flour exports in bushels, are as follows:

	1923-24	1922-23
United States	91,651,000	118,918,000
Canada	22,146,600	26,129,000
Argentina	56,557,000	60,061,000
British India	11,201,000	7,845,000
Australia	32,987,000	26,652,000
Russia	2,000,000	5,500,000
Other countries	1,250,000	1,250,000

Russia has also increased its bushels in the 1923-24 period. Canada has now displaced the former leader, the United States, and seems to be in a position from which there will be no going back. The prophetic vision of those who said that Canada would one day become "the granary of the world" has come to realization. It should mean something to the Canadian people. —Moss Jaw Times.

Ordinary Men

Possible For All Men to be More Efficient if They Only Try

"We can't all be extraordinary," a speaker said recently, addressing a gathering of young men. "Many of us must be common, ordinary men."

This may be a level-headed, commonsense statement, but it is a very uninspiring doctrine to preach to young men, or to men or women of any age.

The truth is that it is possible for all of us to be one hundred per cent more efficient, more successful, better developed all round than we are today. But as long as we hold the idea that we can't be anything out of the common, we can't.

As Emerson says, he who aims at a star will shoot higher than he who only aims at a tree. As long as we think that we, with multitudes of others, must be ordinary men and women we will be ordinary.

A sculptor cannot exceed his model. The model of ourselves that we hold in mind will determine the height to which we will rise.

Direction Finding Stations

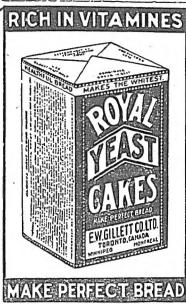

Since the beginning of the new year, the seventh of Canada's direction finding stations has been completed for service by the radio branch of the Department of Marine and Fisheries to serve the boats which navigate the Bay of Fundy and the stretch of coastal waters to Boston. Once a ship in distress is within 100 miles of the Canadian shore, no matter where on the Atlantic or Pacific sides, it is possible for the wireless operator to press the signal and get communication and assistance in location from a finding station, specially built for the purpose and equipped with special apparatus.

Making Herself Clear

An Indian paper furnished us with a recent specimen of "English as she is wrote." It is copy of a letter sent by a woman teacher to the director of education, Manila, and reads: "Dear sir, I have the honor to resignate as my works is many and my salary are few. Besides which my supervising teacher makes many forcing to me which I only reply, 'Oh not, Oh not'—Very respectfully, Josefa—Manila Bulletin.

Germany's Story of War

Germany probably some time next fall will know officially all the ins and outs of the world war of 1914-18, and just what brought it about. The Berlin parliamentary inquiry commission, appointed several years ago to investigate all phases of the conflict, has announced that it hopes to finish its task some time this year, when its full report will be published in 10 or 12 volumes.

MAKE PERFECT BREAD

- Heart of Voltaire

Has Been Found in Paris Where It Was Hidden Sixty Years Ago

The heart of Voltaire, the famous French satirist which was lost after being locked in a silver casket and solemnly deposited in the National Library in Paris about sixty years ago, has been found hidden under a layer of dust in a corner of a disused room.

M. Martel, the newly appointed head of the library, made the discovery. While exploring the premises he entered an abandoned room, and saw the casket in front of the pedestal of Houdon's original statue of Voltaire. The statue and the casket were covered with two inches of dust. The casket, which was bore the inscription, "Voltaire's heart."

As soon as a key can be made it will be opened by the minister of education and transferred to the Pantheon to rest beside the ashes of France's illustrious sons.

To have children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves Worm Exterminator.

B.C. Lumber Goes to U.S.

American orders for lumber produced by the interior mountain mills of British Columbia and Western Alberta, are the source of a very satisfactory volume of business this spring.

A biplane recently reached the astonishing speed of 248 miles an hour.

Buys Thousand-Dollar Cow

Japan is Taking No Chances With Scrub Cattle

A Woodstock cow, Colantha Merstein which topped her class in the 305-day division of the R.O.P. tests, has been sold to the Japanese Government for \$1,000. It's just as easy to raise \$1,000 cows as it is to raise \$100 ones. The Japs, who by going into the dairy business, intend to replace the rice and fish diet of their people, with one more like that which has made the white races what they are, take no chances with buying scrub cattle. Neither should our farmers. If they can sell cows for \$1,000 apiece, they should raise that kind.—Border Cities Star.

WHEN YOUR THROAT IS SORE

It may be only a slight cold now, just tickling in the throat.

But little colds soon grow large and dangerous. Often they become catarrhal and end in consumption.

Catarrhose is the cause of many colds, coughs, bronchitis, inflammation and soreness out of the throat. Relieves the cough, cuts out the phlegm, makes breathing easy, kills any germs lodged in the mucous membranes.

Inhalation of CATARRHOSE INHALER now and again you keep the

passages free from germs, and there

by prevent coughs and colds. Get the inhaler first, it lasts two months.

Small size 50¢, sold at druggists. Refuse a substitute for Catarrhose.

By mail from the Catarrhose Co., Montreal.

H.M.S. Lion's Fate

Must Beatty's Famous Flagship Become Only "Scrap Iron?"

The Admiralty announcement that, owing to the terms of the Washington agreement, it is not possible to avoid scrapping the famous battle cruiser Lion, has caused regret in naval circles where it was hoped that the life of Beatty's flagship might be prolonged for a few more years.

It has been urged in many quarters that the vessel should be preserved as a national war relic.

The vessel has been sold to a firm of shipbreakers for £77,000, and it is uncertain where she will be broken up.

The Lion, which mounted eight 13.5-inch guns and had engines of 70,000 horsepower, took a conspicuous part in the battle of Dogger Bank—the first encounter between super-dreadnoughts—and in the Jutland battle, during which 99 officers and men were killed.

In the latter fight the vessel was on fire, but Major Harvey, who had both legs shot off, saved the ship by ordering the magazines to be flooded—galantry which was rewarded after his death by the V.C.

"Standby" Cakes

To Be Served At Tea Or At Luncheon Or With Other Desserts

For this with this and other desserts and to serve with tea at luncheon one may make these attractive "standby" cakes instead of the usual cookies. These get their name because they are the housewife's "standbys"—they can be kept on hand always and, instead of getting stale, they improve with age.

Cream three-quarters of a cup of butter and then gradually add a cupful of brown sugar. Beat two eggs well and stir them up. Sift together a cup and a half of flour, a teaspoon of cinnamon, a quarter teaspoon of cloves and half a teaspoon of nutmeg (this last may be omitted if desired), and add these to the other ingredients. Then stir in a cup of seedless raisins and half a cup of chopped nuts.

Place the batter by spoonfuls on shallow greased enameled ware baking pans and bake until brown.

Looking For Circus Jobs

Sixty Thousand Applied For Positions

In German Show

Sixty thousand people of both sexes and all ages and classes applied for jobs in the well-known German Sarasan circus, which recently left Dresden for a South American tour. Emigration with passage paid was the inducement.

Members of the aristocracy and executives who held high positions in the war were among the applicants.

A former cavalry general asked if he could be taken as a groom, while a distinguished military engineer thought he had qualifications for a stage hand.

In England many people have bought submarine chasers and converted them into house boats. Stripping them of their large, high-speed engines, they make cozy homes.

A-Daring Stunt

Bobbi Leach Would Go Over Niagara Falls in a Rubber Ball

Bobbi Leach, who went over the Horse Shoe Falls in a steel barrel on July 25, 1911, has announced that he is negotiating with a rubber company for the manufacture of a rubber ball in which he plans to make a trip over the falls early next June. Prior to the fall trip, Leach says he will make three parachute leaps from the upper steel arch bridge on successive Sundays.

The ball will be of the thickness of an ordinary large automobile tire and will have a hammock inside in which he will recline. Leach said. He plans to have the ball, with himself as passenger in the water a few hundred feet above the falls on the Canadian side. He believes that the ball will clear the great plunge of water and will land safely in the river below.

Leach has attracted attention by daring feats about the falls for several years. In addition to going over the falls in a barrel, he made a one-minute leap from the upper bridge on April 21, 1911, and went through the lower rapids and whirlpool in a barrel on June 28, 1911.

Had A Weak Heart Was Very Nervous For Three Years

Miss Jessie Peterson, Zealandia, Sask., writes: "I wish to know how much good Milburn's Heart and Nerve Pills have done for me."

For nearly three years I was very badly run down, had a weak heart, and was so nervous that sometimes I would almost fall asleep.

I have tried many people who had recommended your Heart and Nerve Pills, so I decided to give them a trial. After I had used two boxes I found they had done me good, and after having taken five boxes I was completely well.

I cannot recommend your Pills enough, and I would advise anyone having a weak heart or troubled with nervousness to use them."

At Milburn's H. & N. Pills are 50¢ box for adults, or mailed direct on a sample of price. The T. Milburn Co., Limited, Toronto, Ont.

Marketing Timothy Seed

The success that has been attained in the production of timothy seed in Pincher Creek district of Alberta has led to the formation of a co-operative association for the sale of the output. High honors were won by seed growers of this locality at Winnipeg recently as well as three out of four prizes at the provincial seed fair.

Arrangements are being made for exhibits of timothy seed from Pincher Creek to be forwarded for the British Empire Exhibition at London this summer.

The association now has over 200 members and controls 75 per cent of the tonnage produced in that vicinity.

Engines are preparing plans for a massive tower used as a wireless station will be 1,200 feet high.

MRS. ROSE PETERS

Toronto Woman Advises Young Mothers!

Toronto, Ont.—During all my years of wifehood and motherhood I have had great trouble with my kidneys.

Dr. E. H. Fawcett's Prescription that I do not hesitate to recommend to other women who need strength and energy is the best. Fawcett's prescription relieved me of all nausea or sick stomach, and kept me well and strong during each of my four expectant and periods and I feel quite sure that my babies were for they were plump and exceedingly healthy from Mrs. Peters, No. 277 St. George Street.

Health is most important to every woman. You cannot afford to neglect it when you have a family. Fawcett's prescription is made in tablets or liquid. This prescription is made in Dr. Fawcett's laboratory. One tablet costs 10 cents there. If you wish a trial package,

May Abolish Passports

Continuance of British Formality Against Canadians Considered Unfair

Strong representations are being made to the foreign office against the system which makes it necessary for Canadians at present to obtain passports before entering Great Britain. Passports are unnecessary for British people entering Canada and continuance of the British formality against Canadians is considered unfair. The recent increase in the price for passports, from two to five dollars each, adds force to the movement and it is expected that the present regulation will be rescinded immediately.

SUNDAY SCHOOL LESSON

APRIL 13

ELIJAH AND THE STRUGGLE WITH BAAL

Golden Text—No man can serve two masters. Ye cannot serve God and mammon. Matthew 6:24.

Lesson—1 Kings 16:29 to 19:21; Chapter 21; 2 Kings 1:1 to 2:15; The Devotional Reading—Psalm 15.

The Text Illuminated and Explained

I. True-Hearted, Whole-hearted, verses 20 and 21. Abah did Elijah's bidding, but abandoned the path of God and the path of Baal. Carmel: see the Historical Background. "How long go ye limping between the two sides?" sternly asked Elijah, pointing the people to the idea in the original web word translation, which suggested hopping backward and forward, like a bird from branch to branch. The people were serving neither God nor man. "If Jehovah be God, follow him, but if Baal, then follow him," continued the prophet. And the people answered him not a word. "The vast multitude that filled every nook of vantage, and rose on every side, gave me strength. Probably we were deeply convicted by the challenge, profoundly conscious that it was well deserved." Yet how many amongst us today are acting in the same manner, hailing here and there the voice of Christ and obedience in self-interest. They are for a time deeply moved by a religious appeal, but a few weeks pass, and they are on again, cut off from the truth, halters between two cutts! (F. B. Meyer).

Corruption Is Rare

Ambassador Says Things Not So Bad In U.S. As British Think

Frank B. Kellogg, the United States ambassador, told British newspapermen at the London Press Club, that things in the United States were somewhat different from what the British reading public were led to believe.

From reading the English press comment the last two months, one might conclude that the public in the United States is generally corrupt and permeated with graft," he said, "but such is not the case. The public served in the United States, as in England, generally, is of a high order of ability, patriotism and morality, corruption is the rare exception and it is, as it should be, ruthlessly exposed and proscribed."

"One might also think from reading the newspapers that the entire United States is wet, and that more liquor now is consumed than before prohibition," he continued. "Before prohibition the press, very naturally, did not publish the conditions brought about by the saloon, while since prohibition every violation of the law through rum running makes sensational news."

Child Labor In U.S.

In extreme depression or in extreme prosperity children tend to leave school and go to work. In one case poverty is the cause, in the other a chance to earn high wages. The Supreme Court has held that under our constitution Congress has no power to regulate the labor of children. The matter rests with the states, not half of which have adequate laws on the subject. Recent statistics show that during the past year child labor has been increasing—Youth's Companion.

Externally or Internally, it is Good.

—When applied externally by brisk rubbing, Dr. Thomas' Eclectrie Oil cures the most painful sores and ulcers, taking away the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Average Farm Wages

The average wages of farm help in Canada shows a slight increase for 1923 as compared with 1922, according to compilations of the Dominion Bureau of Statistics. The average wages per month of farm helpers, during the summer season of 1923, including board, were for men, \$61, as against \$59 in 1922, and for women, \$39, the same as in 1922. By the year the average value of males, including board, was \$611 for 1923, as compared with \$418 in 1922.

The "Lightnin'" company will also engage in engagements in Saskatoon, Regina, Moose Jaw, Medicine Hat, Lethbridge, Edmonton, Calgary, Vancouver and Victoria, before returning to the States for engagements in Seattle and Portland.

Under a new law in China the consent of a father and mother has to be obtained before a divorce can be granted.

W. M.

J. W. LAWRENCE,

Secretary

Spring Clean-Up

Well, well, Spring is here and we are ready to clean up, paint up and generally renovate the whole place. Let us start with a will and do the whole town. Get rid of that unsightly rubbish, that is heap and that dried heap of weeds in fence corner. Better still let us start with a spring resolution not to let that odd piece of paper get away from us to litter up the streets of Cereal or Oyen. April is the time! Chinook is the place! Town council, citizens and residents get busy.

School Fair

Is prepared to conduct all kinds of Auction Sales. Prices moderate. Dates can be made at the Advanced Office, or at the Acadia Hotel CHINOOK.

King Restaurant

Meals at all hours. All kinds of Tobacco, Candies and Soft Drinks

Chinook U.F.A. Local

The last U.F.A. meeting for this season held on Friday evening proved enjoyable and instructive to those attending. One of the most interesting items on the program was an address by Mr. L. S. Dawson on the debate between Dr. McGill and Aaron Sapiro. In his introductory remarks Mr. Dawson informed the audience that there was no debate. Dr. McGill simply outlined the workings of the Grain Exchange which he declared to be essential in the grain trade. In referring to Mr. Sapiro's speech, Mr. Dawson gave out some interesting points which Sapiro advocated in co-operative selling using the case of the tobacco growers in the States as an example of prosperity brought about by co-operative selling. Mr. Dawson also mentioned the fact that a local man, who had a relative in the States where this co-operative system was established, stated that the business men of this particular district had benefited as well as the tobacco growers. Mr. Dawson advocated that everybody should boost for the wheat pool because it helped the farmer it would also help the business man.

Mr. E. Proctor also gave a talk on the Municipal Hall Insurance, pointing out the new features which will be put into effect this year. Miss Neff favored the audience with a piano solo.

Letter to Editor

Dear Sir:

Now that Spring is here would it not be well for us all to get busy and clean up the rubbish that has accumulated through the winter. A walk about our town will convince any one of the need for cans, old papers, weeds and all sorts of odds and ends everywhere. The Council could set us a good example by cleaning up the street and town property.

Then why not go a step further and level up the lot where the town hall stands and plant some trees. Also have the old burnt machinery and other debris where the various fires have taken place cleared away, and have a village

The annual bull sale held in Calgary recently, was very successful, some good prices being realized. A total of 151 short-horns changed hands, as well as 44 Angus and 119 Herefords. The total amount involved in the sales was about \$42,480.

looking as if some one cared for its appearance.

The School Board could cultivate a strip of land around the border of the school property and plant it with trees. A very small outlay and reasonable care would make a vast difference in the appearance of our town.

Follow this up by improving the roads entering the town both east and west. On the east, acquire a right of way across the corner of Lensegraf farm and do away with the necessity of crossing the railway twice in entering the town. The entrance from the west could be improved also, and the numerous automobiles which now pass by our town could be brought through the town and these travellers would leave many dollars with us...

**Canadian National Railways
Colonization and Development Department**

The work of this department is being rapidly extended throughout Western Canada to be of the best possible service to the public, and through its special representatives in the East, in Great Britain, Norway, Sweden, Denmark, and other European countries, it will be able to bring to Canada large numbers of immigrants, male and female, who in a short time should become permanent and desirable settlers. The great obstacle in the past has been the uncertainty of immediate employment for the new arrival and farmers can assist colonization work by employing their help through this channel, and if possible by THE CANADIAN NATIONAL RAILWAYS, the work is done without charge and no advances are required for transportation or for any similar purpose. All information given is used for the purpose of informing the settler requiring work only.
